SUMMARY

Enthusiastic fresher with knowledge of Core Java, SQL, HTML, CSS, web development, and basic Python. Interested in learning new technologies, improving problem-solving skills, and contributing to software and web development projects. Looking for an opportunity to start my career and grow in the IT industry.

WORK EXPERIENCE

Machine learning with python Intern

July 2025 - September 2025 (Remote-IIT Hyderabad)

- Completed a 3 months internship focused on machine learning fundamentals and practical implementation.
- Worked on data preparation, exploratory data analysis (EDA), feature selection, and machine learning model development using Python.
- Used Python libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn for model training and evaluation.
- Demonstrated strong analytical skills and consistency while completing real-world assignments and mini projects.

PROJECTS

Sales-Forecasting-for-Retail-Businesses

- Developed a sales forecasting model for retail businesses to analyze historical sales data and predict future sales trends.
- Performed data preprocessing, exploratory data analysis (EDA), and feature selection to improve data quality and model performance.
- Built and evaluated machine learning models using Python libraries to support better business decision-making and inventory planning.

EDUCATION

2023 - 2027	KL University(CSE)	(CGPA: 8.61)
2021 - 2023	Sri Abida Jr College(MPC)	(CGPA: 6.81)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- MongoDB Python Developer

SKILLS

Programmming Languages : Core Java, Python(Basics),SQL.
Web Technologies : HTML,CSS.
